

# LANscape® Solutions Extended Warranty<sup>SM</sup> Program

Corning Cable Systems

**LANscape®**

Fiber Cabling Solutions for Premises Networks

## DESCRIPTION

To facilitate the professional installation of Corning Cable Systems' products, Corning Cable Systems can refer you to a worldwide network of LANscape® Solutions Extended Warranty<sup>SM</sup> Program (EWP) installers. In addition to providing expert installation service, these installers also offer extended product warranties on complete LANscape solutions.

### Installation Expertise and Reliability

Every member of the Corning Cable Systems EWP is carefully selected and factory trained by Corning Cable Systems. Each member-company meets our stringent requirements for technical experience, financial strength, and proven dedication to quality. EWP members must demonstrate ongoing commitment to extensive training, completing both hands-on and theoretical courses in fiber optic design and installation. Members are required to update training at least once every two years to ensure expertise on the latest technology and most current product enhancements. Unlike other extended warranty installer programs, Corning Cable Systems LANscape Solutions Extended Warranty Program is exclusive. Only skilled installer companies measuring up to Corning Cable Systems' quality and training requirements are invited to join. Corning Cable Systems has built a strong and lasting relationship with contractors, designers, specifiers, engineers, and end-user customers by promising and then providing reliability and performance.

### Extended Warranty Protection for 25 Years

The extended warranty or Extended Warranty<sup>SM</sup> Program ensures compliant performance of Corning Cable Systems LANscape Solutions products selected in accordance with domestic industry standards such as ANSI/TIA/EIA-568, Commercial Building Telecommunications Cabling Standard and ANSI/IEEE Std. 802.3, Standard for Carrier Sense Multiple Access with Collision Detection (CSMA/CD) Access Method and Physical Layer Specifications. The most current revision level for each domestic industry standard will be applicable. The Corning Cable Systems LANscape Solutions Extended Product Warranty protects the performance of your LANscape Fiber Optic Cabling Solution for a full 25 years. The warranty covers each product component of your Corning Cable Systems cabling system including optical fiber cables, interconnection and splice hardware, mechanical splicing products, and field-installable connectors. Corning Cable Systems will repair or replace defective products.

*A LANscape Solutions EWP 25-year system warranty is offered through an EWP installer member when all products in the fiber cabling solution are Corning Cable Systems LANscape Solutions covered products. Two-year system warranties are also available on Corning Cable Systems' products when systems contain additional products not manufactured by Corning Cable Systems and installed by an EWP member.*

To find a current listing of Corning Cable Systems LANscape Solutions Extended Warranty Program members in your area, please visit our website at [www.corning.com/cablesystems](http://www.corning.com/cablesystems).
