

## Warranty Features

The Siemon Company and CommScope are pleased to announce the Vision<sup>SM</sup> Warranty Program. Siemon-CommScope cabling systems use the highest-quality, most technologically advanced cables and connecting hardware. Siemon Certified Installers<sup>SM</sup> are highly trained based on the latest industry standards to ensure the most reliable installation available. Best of all, The Siemon Company holds the entire warranty – covering all connecting hardware, cable, installation and applications – so you have one point of contact. Customers covered by the Vision<sup>SM</sup> warranty can rest assured that their cabling infrastructure will provide many years of trouble-free service.

Here are just a few of the benefits of the UltraLink<sup>SM</sup>, System 6,SM and Ultra 6SM warranties:

### Performance

- ?? Performance guaranteed on all parameters specified by TIA/EIA and ISO/IEC
- ?? More margin on all parameters
- ?? Additional bandwidth at higher frequencies
- ?? Margin guaranteed across the entire frequency range
- ?? Performance claims based on worst case testing and channel configurations

### Testing & Certification

- ?? All channels (or links) are field tested to ensure warranty compliance
- ?? Field test results are verified by The Siemon Company

### Single Point of Contact

- ?? The Siemon Company is the single contact for any warranty issues

### Highly Trained Network of Certified Installers<sup>SM</sup>

- ?? Vision<sup>SM</sup> Certified Installers<sup>SM</sup> attend a rigorous training course covering standards, in-depth installation techniques, and system design
- ?? Installers attend re-certification classes every 2 years

## Comprehensive Coverage

- ?? Parts
- ?? Labor
- ?? Applications
- ?? 20-year extended warranty

**Note:** Vision<sup>SM</sup> is only available in the United States. For international cabling solutions, please visit The Siemon Company at [www.siemon.com](http://www.siemon.com) or CommScope at [www.commscope.com](http://www.commscope.com).
